Table of Contents

[Work in Progress]

I. Use Case Diagram (incl. crit./non-crit. Use cases)

Remaining: I have to write a description of the critical and non critical use cases

II. UML Domain Model

III. System Sequence Diagrams

IV. Three fully dressed scenarios for three critical use cases

A. A family physician may issue a consultation request for a patient to see a specialist.
B. Administrative staff may register a patient's arrival on the day of their appointment.
C. Administrative staff may book an appointment for a patient that has arrived in a clinic.

V. Identification of System Operations and Operation Contracts.
